PROFESSIONAL SUMMARY

Fresh graduate in Information Systems Engineering with strong foundation in software development, system analysis, and software testing. Experienced in web application development (PHP, MySQL, MVC), requirements engineering (SRS, SDD), and manual testing (test cases, UAT support). Proven ability to analyze data (ROAS, sales reporting) and ensure system quality through debugging and validation. Seeking opportunities as a Junior Developer, QA Tester, or Business Analyst in a software development environment.

TECHNICAL SKILLS

Programming Languages: PHP, Java, C++

Framework / Architecture: MVC

FrontEnd Development: HTML, CSS, JavaScript, React (Vite), Responsive Web Design

Database: MySQL, MariaDB, MongoDB, Microsoft Access

Tools & IDE: Visual StudioCode, NetBeans, ArduinoIDE, RapidMiner

Software & Tools: Microsoft Excel, Word, PowerPoint, Figma, Draw.io, StarUML

Testing & Documentation: Test Case Design, Manual Testing, UAT, SRS, SDD, STD

EDUCATION

Bachelor of Information System(Hons.) Information System Engineering

Universiti Teknologi MARA (UiTM), Shah Alam - (Oct 2022 – Feb 2026)

- CGPA: 3.16

Matriculation (Physical Sciences)

Perak Matriculation College (KMPK), Gopeng- (2021 - 2022)

- CGPA: 3.79 | MUET: Band 3.5

WORK EXPERIENCE

IT Intern

Maryam KhadijahGroup Sdn. Bhd, Penang | Sept 2025 – Feb 2026

- Managed and maintained e-commerce platform data (product listings, inventory records)
- Performed data analysis on Return on Ad Spend (ROAS) using Microsoft Excel
- Generated monthly sales and profitability reports for business decision-making
- Ensured data accuracy, consistency, and proper documentation
- Assisted in troubleshooting basic system and data-related issues
- Supported daily IT operations and administrative tasks

PROJECTS & SOFTWARE DEVELOPMENT EXPERIENCE

- Developed e-commerce web application using Microsoft Access database for product and data management
- Designed mid-fidelity UI/UX prototype using Figma
- Developed sport booking system using MVC architecture in NetBeans (Java)
- Performed manual testing, created test cases, and supported User Acceptance Testing(UAT)
- Identified bugs, performed debugging, and maintained test logs for system improvement
- Designed and developed F&B Inventory Management System using PHP and MySQL, including database design and inventory tracking
- Conducted requirements analysis and produced SRS, SDD, and STD documentation
- Built and deployed online customer booking system using PHP (MVC)and MySQL
- Personal Portfolio Website

ACHIEVEMENTS & INVOLVEMENT

- Dean's Award (Semester 1 & 2), Perak Matriculation College
- Volunteer, Festival Altruisme 3.0, MBSA Shah Alam (2023)
